Smart Search with Sticky Feature

Smart Search

Smart Search shortens the rows displayed on the basis of the text entered in the search box. The shortning happens in realtime and the result is displayed as soon as any character is enetered. It searches only across the columns specified in the searchbox hint by the developer.

 ☐ Sticky Search 😞

So if we search for all rows containing MIR, the system will display rows contaning MIR in Region, KV Name, KV ID.

The search is NOT CASE SENSITIVE.

 ☐

SI	Region	KV	KVID	KV Code
416.	DEHRADUN	MIRTHI, ITBP	18140	18140
571.	GURGAON	HAMIRPUR	21109	21109
680.	HYDERABAD	MIRYALAGUDA	23156	23156
873.	JAMMU	MIRANSAHIB	26115	26115
1065.	MUMBAI	NO.2 MIRC AHMEDNAGAR	29103	29103
1144.	RAIPUR	CHIRIMIRI,SECL	31109	31109
1316.	VARANASI	MIRZAPUR	35135	35135

Sticky Search

Sticky Search comes in handy when you want to shortlist rows on matching multiple cells.

☐ Sticky Search 😞

If sticky is turned on, and you type a word, the list will be shortened. When you clear the test by pressing backspace, the list will not be reset and will be stuck at the shortlisted set. Now if you type in the other search word, the list will get shortened further.

So If we want to search for KV contaning MIR in name and located in Jammu Region, we will first turn on sticky and then search for jammu and then mir or first for mir and then jammu.

First searched for MIR and then Searching for jammu with sticky on
