

Domains & Hostings

Adding a new website (Domain or Subdomain)

1. Go to Files folder and navigate to wwwroot

2. Create folder for the new website or subdomain. A folder can be created in root or inside another folder.

3. Upload the contents in the newly created folder. (Can be done later too)

4. Go to **Website** Link and add Website

Domains & Hostings

The screenshot displays a web management interface. On the left is a dark sidebar with a menu containing: Home, Website (highlighted with a red arrow), FTP, Databases, Docker, Monitor, and Security. The top of the sidebar shows an IP address '159.69.44.70' and a notification badge with the number '0'. The main content area has two tabs: 'PHP Project' (active) and 'Node Project'. Below the tabs, there are three buttons: 'Add site' (green), 'Default Page', and 'Default Website'. A red arrow points from the 'Website' menu item to the 'Add site' button. Below these buttons is a table with columns: Site name, Status, and Back. The table contains two entries: 'ashoksquest.org' and 'python.ashoksqu...'. Both are marked as 'Running' with a green play icon. At the bottom of the table is a 'Please choose' dropdown menu and an 'Execute' button.

Site name	Status	Back
ashoksquest.org	Running	Not
python.ashoksqu...	Running	Not

5. Enter the website URL and click the browse button to select Website Path.

If the directory is not created using steps 1 & 2 above, then simply type a suitable name and it will be created by the system

Domains & Hostings

Add site - Support batch site building

Create site

Batch create

Wordpress deploy

Domain name

bhc.ashoksquest.org

Description

bhc_ashoksquest_org

Website Path

/www/wwwroot/bhc.ashoksquest.org

FTP

Not create

FTP is not installed, click Install

Database

Not create

PHP version

PHP-74

Site category

Default category

SSL

☐ Apply for SSL

☐ HTTP redirect to HTTPS

If you need to apply for SSL, please make sure that the domain name has added A record resolution for the domain name

6. select the directory and proceed to add the website

Domains & Hostings

Select directory
