Sending SMS

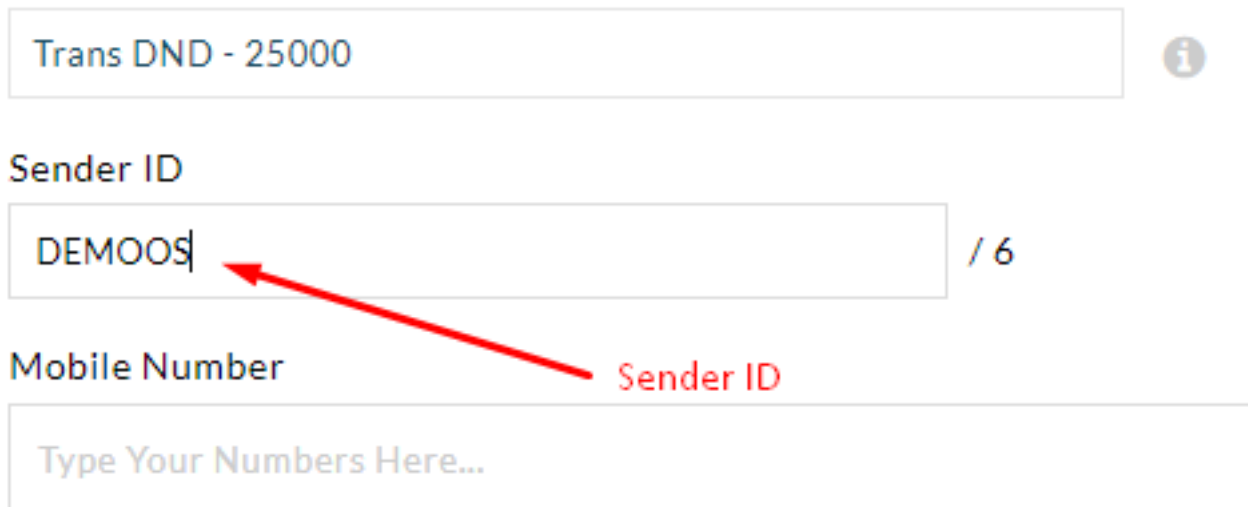

How to send SMS ?

For sending SMS, first [login](#) to your panel.

In your panel, select the route from which you want to send the SMS. In most cases, TransDND route is used.

Enter a Sender ID. The Sender ID must have been approved for use with the selected route. [Contact Medialab](#) for more details on Sender ID

A screenshot of the SMS sending form. The 'Route' dropdown is set to 'Trans DND - 25000'. Below it is the 'Sender ID' field containing 'DEMOOS' with a character count of '/ 6'. A red arrow points from the text 'Sender ID' to the 'DEMOOS' text. Below that is the 'Mobile Number' field with the placeholder text 'Type Your Numbers Here...'. An information icon is visible on the right side of the route and sender ID fields.

Enter 10 digit mobile numbers. You can enter multiple numbers separated by comma or write separate numbers in separate lines. Using +91 is not required.
