Home page and Header data vanished after updating More Info.

Name of institution and address details disappeared after updating More Info.

This issue occurs when certain characters are entered in the HINDI field. This is limitation of Google Hindi API and JSON compatibility.

Solution

Please look for the unwanted character in your More Info page and edit the hindi text to remove that character. The system will automatically rebuild the pages with new data and the issue will be fixed instantly.

Please refer the example below to have an idea of the unwanted character.
